

13MM-S250-4+55CM-685-27-H13-T12-CS-7

Laser Macro Focus Generator with approx. circular beam profile

FEATURES

Laser spot with approx. circular beam profile and extended depth of focus.

Spot diameter: 0.082 x 0.071 mm

Wavelength: 685 nmWorking distance: 233 mmDepth of focus: 11.9 mm

- Macro Focus Generator for extended depth of focus
- With RS232 interface

DESCRIPTION

The laser diode beam source type 13MM-S250-4+55CM-685-27-H13-T12-CS-7 produces a circular laser spot with extended depth of focus. The beam profile is approx. Gaussian. More precisely it has an elliptical intensity distribution clipped by a circular aperture.

The laser has integrated electronics <u>type CS</u> for control of the laser output power and serial interface (RS232). The output power can be controlled using the <u>modulation input ports (TTL and analog)</u> or manually using the potentiometer.

The working distance can be adjusted by adjusting the focus setting. Please note that the spot diameter increases proportionally to the working distance. A fine-adjustment of the distance between laser and target is recommended for fine-focusing.
