

## 25M-M100-26

Micro Focus Optics

### **FEATURES**

Micro focus optics used for focussing the collimated radiation exiting a fiber collimator.

- Attachment optics for fiber collimators type
  60FC-L or 60FC-T with outer diameter Ø 32 mm
- Focal length f' = 100 mm
- AR Coating 420 700 nm
- Achromatic correction

## **DESCRIPTION**

The Micro Focus Optics type 25M-M100-26 is used to generate a small laser spot from the collimated radiation of a fiber collimator.

The <u>size of the spot</u> and its <u>Rayleigh range</u> is determined by the fiber properties and by the focal lengths of the fiber collimator and of the micro focus optics. For single-mode fibers the Gaussian intensity distribution and beam shape are maintained.

It is designed for the fiber collimators series  $\underline{60FC-L}$  or  $\underline{60FC-T}$  with an outer diameter Ø 32 mm.

### Adjustment:

In order to change the working distance of the Micro Focus Optics the lens position of the adjacent collimator has to be readjusted.

#### Housing material:

As standard, the housing of the Micro Focus Optics is made of nickel silver. For amagnetic fiber collimators Schäfter+Kirchhoff offers Micro Focus Optics with housings made of titanium.

### TECHNICAL DATA

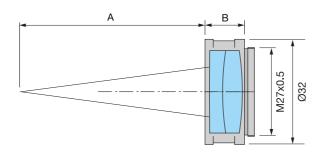

25M-M100-26

Series 25M

**Order Code** 25M-M100-26

Focal length	100 mm
Working distance A	92.4 ± 0.2 mm
AR coating	26
Wavelength range	420 - 700 nm
Lens type	Doublet optics
Correction	Achromatic
Numerical aperture	0.18
Clear aperture	Ø 23.4 mm
Outer diameter	Ø 32 mm
Length B	12 mm
System mount	M27 x 0.5 mm
Front fitting	-
Housing material	Black anodized aluminum
Weight	
RoHS compliant	
Dimensions (for a complete dimensional drawing please refer to the downloads section)
