

5LMM15-S325-1+55CM-450-44-O06-A7.5-P-6

Macro Line Generator with a fan angle

FEATURES

Laser line with a fan angle, Gaussian intensity distribution and extended depth of focus.

Line length: 86.9 mm
Line width: 215 µm
Wavelength: 450 nm
Working distance: 308 mm
Depth of focus: 212 mm

Macro Line Generator for extended depth of focus

DESCRIPTION

The laser diode beam source type 5LMM15-S325-1+55CM-450-44-O06-A7.5-P-6 has a fan angle of 15° and an extended depth of focus.

The intensity profile is Gaussian in line direction clipped by an aperture with an edge intensity of 15 %. The line width is constant along the laser line. Across the laser line the intensity distribution is approx. Gaussian.

The laser has integrated electronics <u>type P</u> with micro-controller for control of the laser output power. The output power can be controlled using the <u>modulation input ports (TTL and analog)</u> or manually using the potentiometer.

The working distance can be adjusted by adjusting the focus setting. Please note that beam parameters like line length and line width increase proportionally to the working distance. A fine-adjustment of the distance between laser and target is recommended for fine-focusing.
