

5LP40-S325+55CM-640-27-H22-A8-C-6

Micro Line Generator with a large fan angle

FEATURES

Laser line with a large fan angle and Gaussian intensity distribution.

Line length: 228 mm
Line width: 124 μm
Wavelength: 640 nm
Working distance: 317 mm

 Micro Line Generator for small laser line widths and high power density in the focal plane

DESCRIPTION

The laser diode beam source type 5LP40-S325+55CM-640-27-H22-A8-C-6 has a fan angle of 40°.

The intensity profile is Gaussian in line direction clipped by an aperture with an edge intensity of 13 %. The line width is constant along the laser line. Across the laser line the intensity distribution is Gaussian.

The laser has integrated electronics $\underline{type\ C}$ for control of the laser output power. The output power can be controlled using the $\underline{modulation\ input\ ports\ (TTL\ and\ analog)}$ or manually using the potentiometer.

The working distance can be adjusted by adjusting the focus setting. Please note that beam parameters like line length and line width increase proportionally to the working distance. A fine-adjustment of the distance between laser and target is recommended for fine-focusing.
