

# 5LPM40-S000-1+55CM-450-44-O06-A7.5-PS-7

Macro Line Generator with a large fan angle

#### **FEATURES**

Laser line with a large fan angle, Gaussian intensity distribution and extended depth of focus.

Line width: 662 μm
Wavelength: 450 nm
Working distance: 1000 mm
Depth of focus: 1500 mm

■ Line length: 720 mm

- Macro Line Generator for extended depth of focus
- With RS232 interface

## **DESCRIPTION**

The laser diode beam source type 5LPM40-S000-1+55CM-450-44-O06-A7.5-PS-7 has a fan angle of  $40^{\circ}$  and an extended depth of focus.

The intensity profile is Gaussian in line direction clipped by an aperture with an edge intensity of 15 %. The line width is constant along the laser line. Across the laser line the intensity distribution is approx. Gaussian.

The laser has integrated electronics <u>type PS</u> with micro-controller for control of the laser output power and serial interface (RS232). The output power can be controlled using the <u>modulation input ports (TTL and analog)</u> or manually using the potentiometer.

The working distance can be adjusted by adjusting the focus setting. Please note that beam parameters like line length and line width increase proportionally to the working distance. A fine-adjustment of the distance between laser and target is recommended for fine-focusing.
