

PA-E2000-0

Polarization Analyzer adapters for fiber cables without optics

FEATURES

Polarization Analyzer adapters for fiber cables without optics.

- E2000 PC
- Paraxial coupling axis

This adapter can also be used with fiber connectors of type E2000 PS. Please note, that in this case the iris diaphragm of the Polarization Analyzer cannot be used to reduce laser power as the outgoing beam is too small. Please keep this in mind when analyzing radiation with high power.

FAQ

Polarization Analyzer accessories

There are two adapter options - one without integrated optics and one with integrated optics. What is the best option for me?

For standard applications we recommend to use an adapter without optics since any additional optics may show birefringence and so may falsify the measurement result.
