

Bulkhead Fiber Adapters

Fiber Adapters without Optics

FEATURES

Bulkhead fiber adapters are used either for beam outputs, where no collimation or focusing of the radiation exiting the fiber is necessary, or for beam coupling into connectorized fibers, when a separate coupling optics such as a microscope optics is used.

- FC, F-SMA and LSA (comp. with DIN, AVIO or AVIM) connector
- Inclined coupling axis for APC (angled polish)
- Axial stop of the fiber ferrule for a constant focus position (FC and LSA only)
- Grub screw for an additional locking of the fiber ferrule (FC and LSA only)
- Different mechanical designs
- TILT alignment as an option
- Mechanics made of Titanium as an option
