

Scan Camera Lenses, M39x1/26" (Leica), High Resolution

FEATURES

Scan Camera Lenses (machine vision lenses) with M39x1/26" (Leica) and high resolution are designed for typical magnifications (about 1:2 to 1:25) and rather short working distances. This improves the image quality at the margins compared to photo lenses. They are compatible with Extension Rings of the [EXT-series](#), length 0.5 to 40 mm.
